Re: Radioactive Material License RO4100

Dear WCS Contact:

The Executive Director has reviewed final construction documents as defined in License Condition (LC) 63. LC 63 reads as follows:

63. *The Licensee shall submit final construction documents to the executive director no later than 60 days prior to the planned commencement of facility construction. Construction may not commence without the prior written approval of the executive director. Construction documents shall include, but are not limited to, all final design plans, elevations, and detail drawings; all final written design specifications and supporting calculations; all equipment vendor data sheets and drawings; all materials specifications and data sheets; construction schedules; construction quality assurance plans; engineering reports addressing compliance with applicable design codes and standards; and any other documents related to the construction of the facility.*

As required by LC 63 in pertinent part, the final construction documents meet the requirements to address design and configuration of the disposal units; interim and final cover; surface water and stormwater management; rainwater capture and leachate collection, detection, and removal systems for the disposal units; and, design and re-location of any waste staging building.

Pursuant to LC 63, the Executive Director now approves the commencement of construction subject to all applicable license conditions, rules and statutes.

Sincerely,

A handwritten signature in black ink, appearing to read "Mark R. Vickery", with a large, stylized loop at the end.

Mark R. Vickery, P.G.
Executive Director
